Self-Evaluation { High Distinction }:

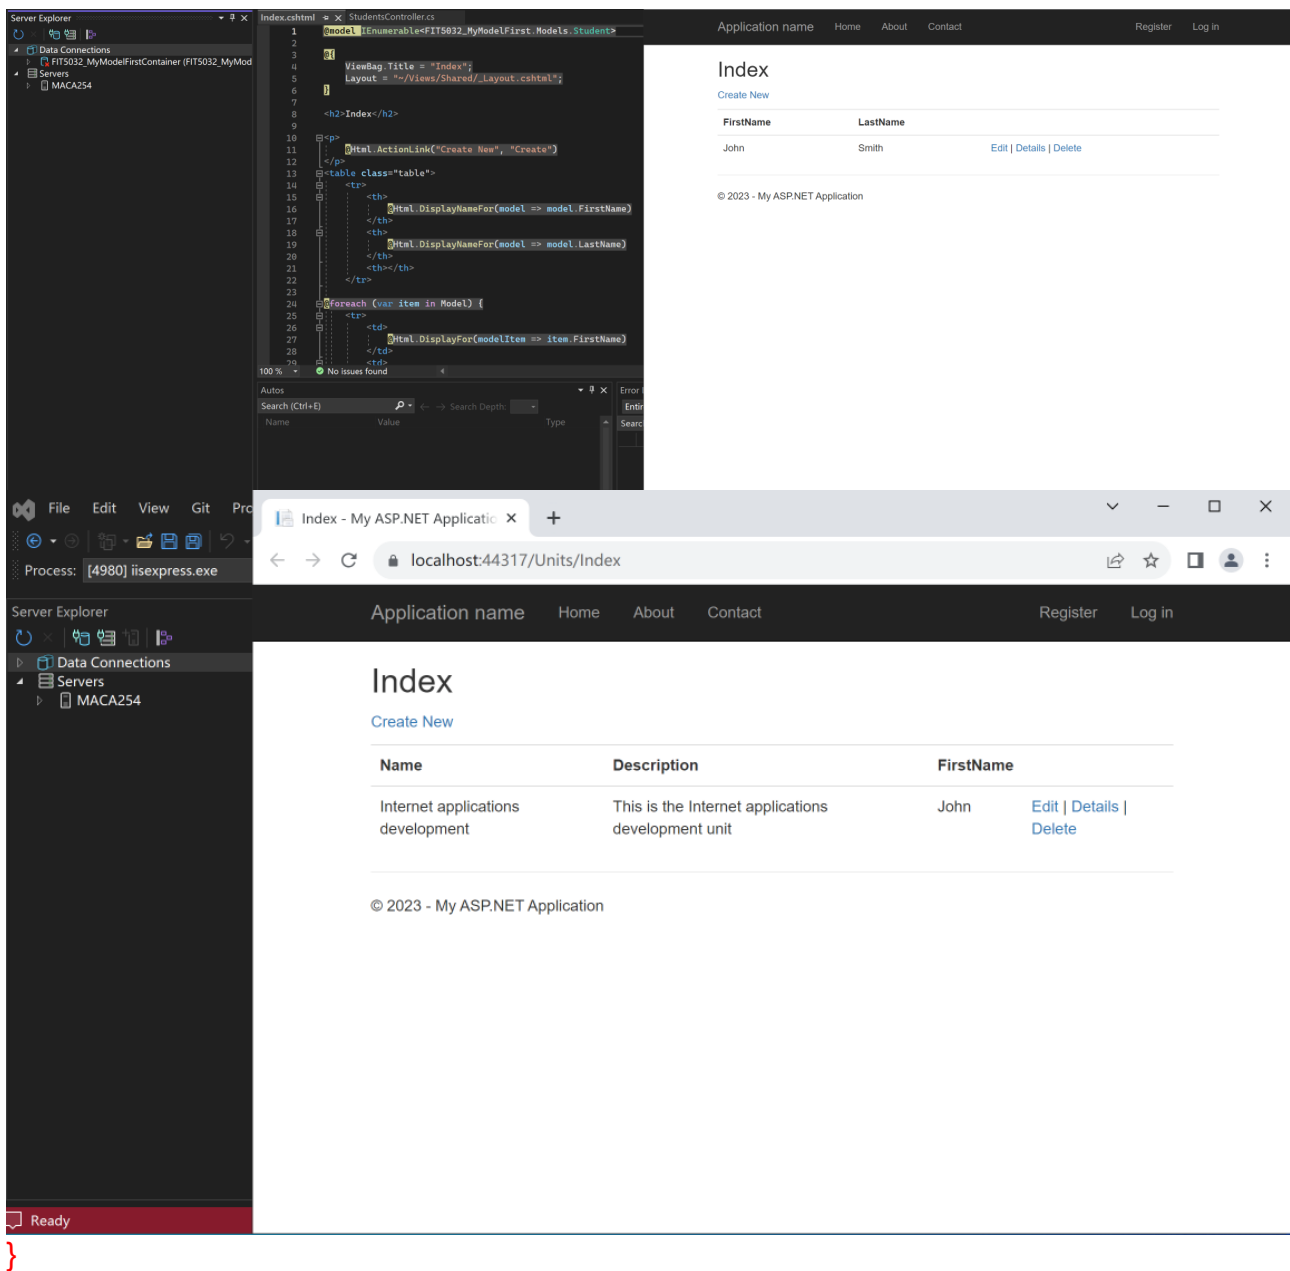

Need Help	Work in Progress	Pass	Credit	Distinction	High Distinction
-----------	------------------	------	--------	-------------	------------------

Task {4.1}:

{Answers}

{Screenshots:

The screenshot displays the development environment for an ASP.NET application. On the left, the Visual Studio IDE shows the code for `Index.cshtml`. The code includes a `ViewBag` title, a layout, and a table structure. The table has columns for `FirstName` and `LastName`. The `foreach` loop iterates over the `Model` and displays the first name of each item. The browser window on the right shows the rendered page at `localhost:44317/Units/Index`. The page has a navigation bar with links for `Application name`, `Home`, `About`, `Contact`, `Register`, and `Log in`. The main content area displays the `Index` page with a `Create New` link and a table. The table has columns for `Name`, `Description`, and `FirstName`. The table contains one row for `Internet applications development` with a description of `This is the Internet applications development unit` and a first name of `John`. The footer of the page displays `© 2023 - My ASP.NET Application`.
